

## In Recognition

### Atmospheric Resources Cooperative Observer Network (ARBCON) Yearly Certificates

The ARBCON is comprised of nearly 400 volunteer observers across the state of North Dakota. Since 1977, observers have recorded daily rainfall and hail occurrences at their locations for the months of April through September of each year. Starting in October 2010, some observers began snowfall reporting, thus making the network operational on a year-round basis.

The following individuals are being recognized for their efforts to help the ARBCON be successful! Thank you all very much!

Last Name	First Name	Years Volunteering
ANDERSON	JILL	40
DILSE	STUART	40
