

107

STATE WATER CONSERVATION COMMISSION
Minutes of Meeting
Held in Gardner Hotel, Fargo, North Dakota
October 26, 1958

A regular meeting of the North Dakota State Water Conservation Commission was called to order on October 26, 1958, in the Gardner Hotel, Fargo, North Dakota, to consider routine business matters. The following were present:

MEMBERS OF THE STATE WATER CONSERVATION COMMISSION

Earle F. Tucker, Vice Chairman, Bismarck
W. W. Corwin, Member from Fargo
Einar Dahl, Member from Watford City
Oscar Lunseth, Member from Grand Forks
Milo W. Hoisveen, Secretary & Chief Engineer, State Engineer, Bismarck
Fred J. Fredrickson, Planning Coordinator, Washington, D. C.
Vernon S. Cooper, Assistant Secretary

The meeting was called to order at 9:00 o'clock p.m., by Vice Chairman Tucker with Commissioners W. W. Corwin, Einar Dahl, Oscar Lunseth, Secretary Hoisveen and Fred J. Fredrickson present. The meeting was held at Fargo to enable Commission members to attend the State Reclamation Association convention scheduled for October 27th in the Gardner Hotel.

It was moved by Commissioner Einar Dahl and seconded by Commissioner Lunseth that the Minutes of the October 13th meeting be approved. All members voted aye and said motion carried.

Secretary Hoisveen read letters from the North Dakota Reclamation Association and the Missouri Souris Projects Association thanking the Commission for membership dues forwarded the respective organizations. Both of the organizations were highly appreciative of the support given them.

Secretary Hoisveen read a letter received from Mr. N. B. Bennett, Jr., Chairman of the International Souris-Red Rivers Engineering Board, United States Section. Mr. Bennett stated that the International Joint Commission has requested the Engineering Board to conduct a preliminary investigation, the purpose of which is to determine the feasibility of, and the respective advantages and disadvantages which might accrue to the United States and Canada from permitting waters imported from the Missouri River into the Souris River Basin to flow down the Souris River into the Province of Manitoba and thence to be diverted into the Pembina River and ultimately into the Basin of the Red River of the North. Mr. Bennett requested Secretary Hoisveen to serve on said Engineering Board. It was moved by Commissioner Lunseth and seconded by Commissioner Einar Dahl that Secretary Hoisveen accept said invitation and serve on the Engineering Board. All members voted aye and said motion carried.

A letter from Dr. H. M. Berg of Bismarck was read by Secretary Hoisveen. Doctor Berg requested the State Water Conservation Commission to replace a culvert on Lake Etta and Alkali Lakes so as to drain alkali down to its normal level. He indicated that he felt this would aid in making it a duck breeding ground and hunting area. It was moved by Commissioner Lunseth and seconded by Commissioner

108

Einar Dahl that Secretary Hoisveen be authorized to conduct a survey in said area. All members voted aye and said motion carried.

Secretary Hoisveen stated that he has had correspondence with a Mr. Carl Torkelson of Grafton relative to raising the water level of Vigness Dam. The water from the dam is used for the city's municipal water supply and it is essential that an adequate amount be available at all times. The city obtained their water from artesian wells until four years ago. The city has inquired as to the cost of raising said dam approximately two feet. Secretary Hoisveen stated that he estimated it would cost approximately \$1,000 to raise the dam one foot but considerable more work would be involved in raising said dam two feet and it would cost approximately \$5,700. He further stated that he recommends that under present conditions the dam be raised two feet. This additional footage will also give the city approximately 50% more water for use. It was moved by Commissioner Oscar Lunseth and seconded by Commissioner Einar Dahl that the State Water Conservation Commission cooperate with the City of Grafton in raising said dam two feet and that the costs be shared on a 50-50 basis. Upon roll call all members voted aye and said motion carried.

Secretary Hoisveen reported that about a year ago the Commission participated in raising Long Creek Dam at Crosby but that some farmers upstream are apparently having difficulty on a crossing which has been adversely affected by the higher pool elevation. The farmers in the area have taken the matter up with all affected parties and have now requested that the Commission participate in building a structure which would give them added protection from high water. The estimated cost of said structure is \$1,250 and there would be five participants, which are - Divide County, Blooming Prairie Township, Fillmore Township, the Park Board and the State Water Conservation Commission. It was moved by Commissioner Einar Dahl and seconded by Commissioner Lunseth that the State Water Conservation Commission participate and contribute one-fifth of the cost of said structure. All members voted aye and said motion carried.

Commissioner Corwin stated that there are three or four dams upstream which are gradually deteriorating and indicated that if the same were bonded and repaired at the present time the cost would not be prohibitive. He presented a resolution from the City of Fargo requesting the State Water Commission to assist the City of Fargo in the repair of said dams. Mr. Corwin implied that the city uses the dams in connection with their municipal water supply. Each dam has a gate which permits the city to withdraw water from the resulting water during periods of low flow. The gates require some repair. It is estimated that it will cost approximately \$3,000 to \$4,000 to repair each of said dams. It was moved by Commissioner Lunseth and seconded by Commissioner Corwin that the State Water Conservation Commission participate in the cost of repairing said dams up to 25% of the cost but not to exceed \$4,000, should this fall within the estimated cost which will be made by the Commission. Upon roll call all members voted aye and said motion carried.

Commissioner Einar Dahl stated that the Commission has conducted an investigation on a dam site in the Tobacco Garden Creek area and that the landowners want to know if the water is suitable for irrigation. He further stated that landowners of Hofflund Flats, Nesson Flats and the Tobacco Garden Creek area are desirous of having a meeting with the State Engineer. Secretary Hoisveen stated that he would like to explore this area in connection with the ancient channel survey. It was moved by Commissioner Lunseth and seconded by Commissioner

Einar Dahl that Secretary Hoisveen be authorized to initiate ground water explorations in the area as requested. All members voted aye and said motion carried.

Mr. Vernon S. Cooper, Assistant Secretary, entered the meeting.

It was reported by Secretary Hoisveen that considerable erosion has occurred on the causeway at Lake Metigoshe and it was necessary to rebuild the same. The riprap job cost \$3200 and the Federal government is paying 50% of the cost of the same. It was moved by Commissioner Lunseth and seconded by Commissioner Einar Dahl that the State Water Conservation Commission participate by paying 40% of the cost to the Lake Metigoshe group. All members voted aye and said motion carried.

The Bowman Haley Project was discussed by the Commissioners. Secretary Hoisveen stated that the Commission has done considerable work on payout schedules on some of the features of municipal and industrial water supply out of Bowman Haley Dam. The Corps of Engineers have come up with a satisfactory benefit to cost ratio on the dam and local assurances are a little higher than anticipated. Secretary Hoisveen further stated that a meeting will be held at Bowman on December 3rd to bring this matter to the attention of the people. It was recommended that Secretary Hoisveen, Commissioner Einar Dahl and Mr. Fred Fredrickson attend said meeting.

Secretary Hoisveen stated that the Commission assisted in replacing two new structures on the Eaton Irrigation Project and that they were very pleased with the work done. Now they are having some difficulty with gates on the main dam and desire assistance on this project. They have requested the Commission to make a cost estimate on what costs would be involved to rehabilitate a portion of the project. Commissioner Einar Dahl moved that the State Water Conservation Commission conduct such a survey, which motion was seconded by Commissioner Lunseth. All members voted aye and said motion carried.

The following water rights were considered:

#768. F. J. Artz of Antler requests the right to divert 160 acre feet of water from Antler Creek to irrigate 80 acres of land. It was moved by Commissioner Corwin that he be granted the right to divert 105 acre feet of water to irrigate 70 acres of land. Commissioner Lunseth seconded said motion. Motion carried.

#769. Harley Kissner of Antler requests the right to divert 152 acre feet of water from Antler Creek to irrigate 76 acres of land. Commissioner Corwin moved that he be granted the right to divert 97 acre feet of water to irrigate 65 acres of land, which motion was seconded by Commissioner Lunseth. Motion carried.

#771. Engleman & Engleman of Hazelton request the right to divert 150.4 acre feet of water from Long Lake Creek to irrigate 75.2 acres of land. It was moved by Commissioner Corwin and seconded by Commissioner Lunseth that they be granted the right to divert 112 acre feet of water to irrigate 75.2 acres of land. Motion carried.

Secretary Hoisveen stated that he has received a request from the Northern States Power Company to change the location of their diversion on the Red River at Fargo. He stated that no more water would be used and the same is used solely for cooling

12

purposes. Secretary Hoisveen stated that he has checked the map indicating the proposed location change and recommends that the same be approved. Commissioner Lunseth moved that said request for a change of location on the new channel be granted, which motion was seconded by Commissioner Corwin. All members voted aye and said motion carried.

Mr. Fredrickson stated that the aerial inspection tour of the Garrison Dam and diversion unit by the Subcommittee on Interior and Insular Affairs has been cancelled. He has been advised that the Committee still desires to make such a tour in the future but no date has been set. The Commissioners will be kept informed.

A letter from Mr. Robert Dohn of Bismarck was read to the Commissioners. Mr. Dohn recommends that approximately 10% of government lands be set aside without any improvements, other than a fence to prohibit free grazing, for hunting purposes. Mr. Dohn desires support on the State level to aid in having such land set aside. It was suggested that Mr. Dohn designate the particular areas which he has in mind. The Commissioners also recommended that this matter be brought to the attention of the Natural Resources Committee and a resolution be obtained from them which could be used in future contacts with the Corps of Engineers. Secretary Hoisveen was directed to write a letter to Mr. Dohn with these recommendations and also to indicate that the State Water Conservation Commission would assist him in the topographic location of possible sites.

The meeting adjourned at 10:15 p.m.

Respectfully submitted,

Milo W. Hoisveen
Secretary

Attest:

John E. Davis
Governor
